PROFESSIONAL SUMMARY

AI Product Manager and BI Products specialist with 9+ years of enterprise experience owning analytics platforms, BI ecosystems, and AI-powered products end to end. SAFe 6.0 Certified Product Owner and Google Cloud Certified Generative AI Leader with a strong track record of defining OKRs, driving product discovery, and delivering scalable data products from requirements through go-live. Hands-on builder of production AI products using Claude API, RAG architecture, n8n, Supabase, and Python. Deep expertise in Qlik Sense Enterprise, QMC, NPrinting, and GCP BigQuery. Seeking AI Product Manager, BI Product Owner, or Senior Data Products roles.

CORE SKILLS & COMPETENCIES

AI & Product: AI Product Management · Agentic AI · RAG Architecture · Prompt Engineering · Claude API · n8n · Supabase · Low-Code AI Development

Product Management: Product Roadmap · OKR Definition · North Star Metrics · Product Discovery · Backlog Prioritisation · PRD Writing · Sprint Planning · PI Planning · SAFe Agile · Scrum · UAT Sign-off · Go-Live Management · Stakeholder Management · Confluence · JIRA

BI & Analytics: Qlik Sense Enterprise · Qlik Management Console (QMC) · NPrinting · Section Access / Row Level Security · Data Modelling · Data Transformation · Incremental Load · Self-Service Analytics · Executive Dashboards · Analytics Roadmap · Data Governance · KPI Frameworks

Data & Technical: GCP · BigQuery · SQL · Power BI · Python · LangChain · pgvector · React · Vercel · Netlify · GitHub CI/CD

AI PRODUCTS BUILT & DEPLOYED

PulseIQ — Real-Time Retail Intelligence Platform

Portfolio Project | Retail Media & Data Pipeline Intelligence

Apr 2026 – Present

- Building AI intelligence layer on top of a retail data pipeline — connecting live shopper intent signals to CPG brand campaign decisions in real time using Claude AI
- Architected event-driven pipeline: n8n automation → Claude AI analysis → Supabase single source of truth → voice and chat agent with 3-layer memory (RAG via pgvector, episodic log, short-term context)
- Conversational AI agent gives brand managers full control — answer questions, explain anomalies, and trigger campaign actions via voice, chat, and automated alerts

Stack: Claude API · Python · n8n · Supabase · pgvector · Lovable · Netlify · Claude Code

ScopeGuard AI — Sprint Scope Creep Detection

Live Deployment: luminous-horse-1f8b1a.netlify.app

Feb 2026 – Mar 2026

- Shipped full AI product — n8n fetches Jira sprint data every 30 minutes, Claude AI generates risk scores (0–100), live dashboard auto-refreshes every 30 seconds with actionable recommendations
- Built RAG conversational agent answering natural language queries using pgvector cosine similarity on historical retrospective data combined with live Jira context

Stack: Claude API · n8n · Supabase · pgvector · OpenAI Embeddings · HTML · Tailwind CSS · Netlify

AI Resume Coach — Career Intelligence Tool

Live on Vercel | Independent Project

Jan 2026 – Present

- Owned complete product lifecycle — discovery through production. Shipped 8 features: resume-JD match scoring, skills gap analysis, AI bullet rewriter, cover letter generation, and conversational career coach
- Critical product trade-off: replaced 800MB infrastructure dependency with 50MB alternative enabling full production deployment within server constraints without quality loss

Stack: Claude Sonnet · LangChain · Python · FastAPI · React 18 · Vercel · GitHub CI/CD

PROFESSIONAL EXPERIENCE

Product Owner — BI & Data Products

BT Group (Openreach) · UK

Dec 2021 – Jan 2026

- Owned product roadmaps, OKRs, and north star metrics for 3 analytics verticals — Fibre First, FND, and Sustainability — supporting 25M premises FTTP build programme under SAFe Agile at programme scale

- Built and owned the Stop Sell dashboard tracking fibre conversion progress across 25 million premises — real-time tranche-level visibility into copper-to-full-fibre upgrade status across the UK
- Designed Sustainability dashboard capturing carbon emissions, vehicle idle time, EV adoption, and route optimisation KPIs — enabling leadership environmental reporting at programme level
- Collaborated with GCP BigQuery data engineering teams on data contracts, pipeline validation, and production readiness sign-off before stakeholder go-live
- Led product discovery workshops, PI Planning, and iteration reviews; owned UAT sign-off and go-live management for all Qlik Sense data products
- Drove self-service analytics adoption — defined adoption KPIs, tracked engagement metrics, and iterated on dashboard design based on continuous user feedback to reduce analyst dependency

Module Lead / BI Product Consultant

Sopra Steria

Mar 2020 – Nov 2021

- Led end-to-end Qlik Sense delivery for major automotive client — full backend scripting, data modelling, incremental load optimisation, Section Access row-level security, and REST connector integration
- Administered Qlik Management Console (QMC) — server configuration, app publishing, data connections, and user access governance across the enterprise environment
- Designed and delivered formal Qlik Sense training programmes — daily 3-hour sessions covering basic and advanced analytics capabilities driving enterprise-wide self-service adoption
- Partnered with Product Owners to define north star metrics and translate business requirements into scalable reporting solutions reducing dependency on central analytics teams

Senior Associate — BI & Analytics

WNS Global Services

Jun 2018 – Dec 2019

- Delivered BI dashboards for GSK tracking YTD/MTD Sales, Market Share, and Growth KPIs across international markets — defined KPI frameworks and presented insights enabling data-driven commercial decisions

Senior Operations Executive — Data Analytics

Infosys

Nov 2015 – Mar 2018

- Built Qlik Sense analytics dashboards for enterprise clients, automated NPrinting reporting delivery, and led requirement workshops defining KPIs and ensuring data accuracy across analytics initiatives
